

The Plunge

The Suwannee River Water Management District invites you to dive into the issues and challenges facing water quality in our region. Take this 3-step pledge to preserve and protect our springs:

I, _____, am taking the plunge to make a splash at home and in my community. I pledge to protect our waters and preserve our natural resources by taking the three easy steps of learning more, doing my part, and sharing my pride. You can count on me to preserve and protect our springs for generations to come.

LEARN MORE.

DO YOUR PART.

- Pick up trash and leave no litter in your yard, neighborhood and town.
- Reduce water usage at home by using only what you need.
- Maintain your existing septic system.
- Consider upgrading to a more enhanced treatment system.
- Reduce use of plastic products.
- Practice Florida Friendly Landscaping to conserve water.
- Dispose of medication and other chemicals appropriately.
- Visit our springs and leave them better than you found them.
- Avoid stepping on plants in and around the springs.
- Don't disturb the animals who call the springs their home.

We hope you're inspired to take actions like these. Small changes make a big difference on our region's water quality. We are counting on you to be a steward of the springs.

SHARE YOUR PASSION.

Be sure to snap a selfie fulfilling your pledge and tag [@Suwannee_River_WMD](https://www.instagram.com/Suwannee_River_WMD) on Instagram. Dive into discussion using [#SpringsDiveIn](https://www.instagram.com/SpringsDiveIn). And ask others to do the same.
